		Number Of Drivers Listed By NHTSA As Drunk With No Proof	98

How To Read This Report:

This report lists all the fatal crashes in Massachusetts for the year 2003 for which NHTSA lists at least one drunk driver. The crashes are grouped by case number and then by vehicle number. For each crash the number of drunk drivers (NHTSA's variable DRUNK_DR) is listed, followed by a running total of drunk drivers, also the number of fatalities for that particular crash is listed followed by a running total of fatalities. Driver and passengers for each crash are presented and are listed by vehicle number. Also listed is whether or not police reported drinking, whether or not NHTSA reports drinking, the alcohol test results and the type of alcohol test. For drivers that have been proven to be drunk, i.e. some form of valid testing was done and alcohol results are known, a running total of those drivers is also listed. RIDL does not agree that police saying a person was drinking is adequate proof. Numbers listed above that say "NHTSA Lists" are derived from "Alcohol Safety Facts 2002" published by NHTSA or found directly in the FARS database.
