

Financial Accounting By Ambrish Gupta Torrent

Financial Accounting for Management: An Analytical Perspective focuses on the analysis and interpretation of financial information for strategic decision making to enable students and managers to formulate business strategies for revenue enhancement, cost economies, efficiency improvements, restructuring of operations, and further expansion or diversification for creating and enhancing the shareholder's value. Though the book has MBA, MFC and MBE students as its primary audience, managers in the corporate sector and students of CA, CWA, CS, CFA and CAIIB will find it equally useful because of its practical orientation.

Studieboek op hbo/wo-niveau.

The thoroughly updated and rewritten edition continues to analyze and explain the applications of financial accounting. The new edition comes with the revised Schedule 3. Divided into 17 chapters, the book explains, with the help of tables, boxes and practical examples, all basic accounting principles. The book has been written in a student-friendly manner so that they can comprehend the subject with great ease. The book is intended primarily for the postgraduate students of management, and also for the students preparing for CA, CS and ICWA. Besides, practising managers should find this book handy for analyzing financial statements. NEW TO THIS EDITION • The book comes along with revised Schedule 3 • It also includes a new Section on Fund Flow Statement • It is incorporated with additional Problems on cash flow statement and ratio analysis • The text is prepared based on IFRS (International Financial Reporting Standards) module • The book comes along with an accompanying CD containing chapter-wise PowerPoint presentations.

The era of nineties has created a new breed of entrepreneurs whose quest for finance is unending. The lending institutions, on the other hand, have become choosy due to, among other reasons, mounting Non-performing Assets (NPAs). All this has led to increased pressure on the availability of finance to the entrepreneurs. In this setting, careful consideration of Project Appraisal and Financing holds the key to survival. Designed in this context, the book begins with explaining the project's fundamentals—features, identification, and project life cycle. It goes on to explain and analyze project formulation, appraisal of promoters and management, market appraisal, technical appraisal, financial appraisal, project report, institutional risk assessment and financing decision. The book also focuses on the concepts of project

management, overruns, post-completion performance evaluation and contemporary issues like infrastructural financing, and environmental impact assessment. All through the book, the emphasis is on critical analysis and decision-making. Primarily intended for the students of MBA/PGDM/PGDBM and other allied courses such as MFC and MBE, the book will also be of immense value to the students of CA, CWA, CS, CFA, CPA and CAIIB. Besides, it will be equally beneficial for the executive development and in-company training programmes on project appraisal and financing. Project finance executives in consulting firms and lending institutions and banks will also be benefited from the book due to its practical orientation. **KEY FEATURES** • Highlights the text from practitioner's perspective. • Written in a lecture mode and conversational style; classroom simulative. • Large number of illustrations, exercises and case studies. • Systematic and organized coverage of a full-fledged manufacturing project, including 10 years' financial projections integrated with the text throughout the book. Contemporary issues like infrastructure financing and environmental impact assessment. Unique pedagogical features, as explained in the 'Visual Tour of the Book' section. Chapter-wise PPTs and Solutions Manual available, on demand, for instructors adopting the book.

Inleidend overzicht van het gehele vakgebied van management.
